EXPERIENCE

Web Developer | Freelance | *React, Tailwind CSS, Figma* | [Link](#)

Jan 2026 - May 2026

- Designed and deployed a fully responsive meditation and wellness website for a practicing psychologist using React.
- Co-ordinated with the client while designing to achieve the desired outcome, added thoughtful assets and animations.
- Achieved near-perfect scores for performance (**96**), SEO (**100**) and accessibility (**94**) on Google Lighthouse.

Tech Executive | Catalyst Tech | *Data Curation, Dataset Benchmarking, NLP*

Dec 2025 - Present

- Curated high-fidelity labeled datasets for drone-based computer vision and object detection tasks.
- Executed preprocessing and QA workflows to eliminate bias and ensure data integrity.
- Aligned dataset specifications with UAV flight dynamics and hardware constraints.
- Independently annotated and segmented a dataset of **5,000+** aerial images, significantly accelerating model training timelines.

PROJECTS

Rewind | *Generative AI, Next.js, Data Visualization, API Integration, Interactive Timelines* | [Link](#)

- **Architected** an AI-powered historical exploration platform combining timelines, cultural insights, and generative storytelling.
- **Developed** a retro-themed interactive web application using Next.js, TypeScript, and Tailwind CSS.
- **Implemented** AI-driven year analysis, comparative exploration, and dynamic data visualizations.

Study-OS | *AI, LLM, RAG, FastAPI, Vector Database, Productivity, EdTech* | [Link](#)

- **Designed** StudyOS, an AI-powered study platform integrating smart notes, RAG-based learning, and productivity tools.
- **Optimized** study workflows through AI-driven note summarization, PDF Q&A, flashcard generation, and task planning.
- **Developed** an intelligent study assistant leveraging **LLMs, embeddings, RAG, and adaptive productivity analytics**.

VoidInk | *NLP, BERT, Multi-Label Classification, Sentiment Analysis, Scikit-learn, TF-IDF* | [Link](#)

- **Engineered** a multi-label NLP model using **BERT and TF-IDF** to detect complex emotions in indie horror game reviews.
- **Built** an AI-powered web platform for real-time emotion mapping with a custom indie-game-inspired user experience.
- **Deployed** a production-ready application on **Vercel**, integrating machine learning inference, API services, and interactive visual analytics.

TECHNICAL SKILLS

Programming & Systems: Python, R, SQL (MySQL), Git, Docker, GCP, VMs, Linux (Ubuntu), FastAPI, REST APIs

ML/DL: Computer Vision, NLP, Supervised & Unsupervised Learning, Clustering, Dimensionality Reduction, Anomaly Detection, EDA, Feature Engineering, Model Evaluation (Accuracy, Precision, Recall, F1, ROC-AUC), Cross-Validation, Hyperparameter Tuning

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, PyTorch, Transformers, Hugging Face, OpenCV, NLTK

GenAI: LangChain, RAG, OpenAI API, Gemini API, Google ADK, Ollama (Local LLMs), Vector Databases (FAISS, Chroma), Embeddings, Retrieval Pipelines, Prompt Engineering

EDUCATION

AISSMS IOIT, Pune | B.Tech in AI & Data Science

June 2023 - June 2027

Relevant Coursework: Statistics, Machine Learning, Artificial Intelligence, Database Management, Programming

EXTRA CURRICULAR

- **NGO volunteer:** Facilitated a 5-day nature workshop focused on environmental protection and local outreach.
- **Linguistic Development:** Studying German to broaden cross-cultural dialogue and professional networking potential.
- **Hospitality team leader:** Oversaw guest relations to optimize visitor satisfaction and project hospitality standards.
